Logitech Tap IP 2

Next-generation, network-connected meeting room touch controller

Meetings of the future are a tap away with Tap IP 2. Brighter and smarter, this network-connected meeting controller gets you into meetings faster. It provides an easy-to-use interface for your team across all types of room configurations. Designed for quick deployment and simple management, and made to work with your preferred meeting platform, Tap IP 2 is the finishing touch for creating a world-class Logitech meeting room experience.

Google Meet zoom Microsoft Teams

- **One tap, any room:** Get into meetings faster with an easy-to-use interface that brings consistent meeting control across all your rooms.
- **Pick your platform:** Make it easy to start and control meetings with Microsoft Teams, Zoom, or Google Meet.
- **Cabling made simple:** Uses a single category cable for both power and data.
- **Flexible mounting:** Installs almost anywhere in the room with flexible mounting options.
- **Simple to manage:** Effortlessly manage Tap IP 2 alongside your Logitech room system.

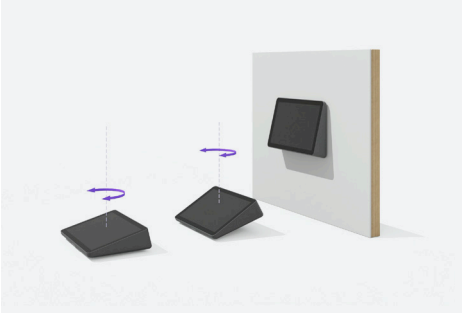
logitech® | AV8 TECHNOLOGIES

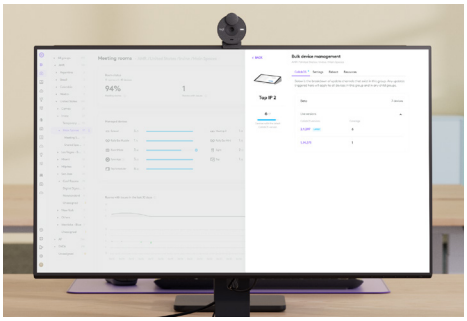
One tap, any room

Tap into meetings with a responsive 10.1" touch display that auto-wakes as participants enter the room. Take control of the meeting with easy access to content sharing, mute, and camera on/off from a simple-to-use interface.

Pick your platform

Provide a world-class meeting experience across rooms of all shapes and sizes. Tap IP 2 is compatible with Microsoft Teams Rooms on Android, Zoom Rooms, and Google Meet Rooms.





Cabling made simple

Uses a single category cable for both power and data, making it easy to install anywhere in the room. Integrated strain relief and retention mechanisms secure the cable entirely within its enclosure and ensure the connection stays plugged in and out of the way.

Flexible mounting

Secure Tap IP 2 almost anywhere in the room with a Table Mount* for flat placement, Riser Mount* to raise the viewing angle, or Wall Mount* to save table space in smaller rooms. It works with existing Tap and Tap IP mounts, so you can keep existing mounts in place when upgrading to Tap IP 2.

*Mounts purchased separately.

Simple to manage

Effortlessly manage Tap IP 2 alongside your Logitech room system with Logitech Sync, Logitech's powerful remote management software. With Logitech Sync, you can configure devices quickly from any location, ensuring seamless setup and control from wherever you are.
